

Listing and Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application:

1-15. (CANCELLED)

16. (CURRENTLY AMENDED) A method for processing a plurality of programs, comprising:

receiving a first user input selecting a first program for ~~removing~~ removal from a first list representing a list of programs ~~selected~~ scheduled for recording;

receiving a second user input selecting a second program for ~~removing~~ removal from a second list representing a list of programs purchased;

determining whether said second program also appears on said first list responsive to said second user input; and

removing, automatically, said second program from said first list if said second program appears on said first list.

17. (CURRENTLY AMENDED) A method ~~of~~ for processing a program, comprising:

removing, in response to a user command, said program from a first list of programs representing programs scheduled for recording;

determining, in response to said user command, whether said program is also a purchased program;

enabling an on screen display including an option to cancel the purchase of said program if it is determined that said program is also a purchased program; and

removing said program from a second list of programs representing purchased programs responsive to user selection of said option.

18. (NEW) An apparatus for processing a program, comprising:

first means for receiving a first user input selecting a first program for removal from a first list representing a list of programs scheduled for recording, and for receiving a second user input selecting a second program for removal from a second list representing a list of programs purchased; and

second means for determining whether said second program also appears on said first list responsive to said second user input, and for automatically removing said second program from said first list if said second program appears on said first list.

19. (NEW) The apparatus of claim 18, wherein said second means enables display of an on screen user option indicating that a user can both purchase and record a selected program so that said user does not have to select one of purchase and record user options and then select the other user option to purchase and record said selected program.

20. (NEW) An apparatus for processing a program, comprising:

first means for receiving a user command;

second means for removing said program from a first list of programs representing programs scheduled for recording responsive to said user command;

said second means determining whether said program is also a purchased program responsive to said user command, and enabling an on screen display including an option to cancel the purchase of said program if it is determined that said program is also a purchased program; and

wherein said program is removed from a second list of programs representing purchased programs responsive to user selection of said option.

21. (NEW) The apparatus of claim 20, wherein said second means enables display of an on screen user option indicating that a user can both purchase and record a selected program so that said user does not have to select one of purchase and record user options and then select the other user option to purchase and record said selected program.

22. (NEW) An apparatus for processing a program, comprising:

a receiver operative to receive a first user input selecting a first program for removal from a first list representing a list of programs scheduled for recording, and to receive a second user input selecting a second program for removal from a second list representing a list of programs purchased; and

a processor operative to determine whether said second program also appears on said first list responsive to said second user input, and to automatically remove said second program from said first list if said second program appears on said first list.

23. (NEW) The apparatus of claim 22, wherein said processor enables display of an on screen user option indicating that a user can both purchase and record a selected program so that said user does not have to select one of purchase and record user options and then select the other user option to purchase and record said selected program.

24. (NEW) An apparatus for processing a program, comprising:
a receiver operative to receive a user command;
a processor operative to remove said program from a first list of programs representing programs scheduled for recording responsive to said user command;
said processor being further operative to determine whether said program is also a purchased program responsive to said user command, and to enable an on screen display including an option to cancel the purchase of said program if it is determined that said program is also a purchased program; and
wherein said program is removed from a second list of programs representing purchased programs responsive to user selection of said option.

25. (NEW) The apparatus of claim 24, wherein said processor enables display of an on screen user option indicating that a user can both purchase and record a selected program so that said user does not have to select one of purchase and record user options and then select the other user option to purchase and record said selected program.
